1 Database Design

1.1 Introduction

Ollert is the backend database for a Kanban Board application (similar to https://Trello.com). It supports multiple users collaborating on one or many boards, through comments and task generation.

1.2 ER Diagram

1.3 Identified Constraints

- Every application user must have both a username and a password
- Usernames must be unique
- Every board must have a title and must be associated with an existing owner
- Every comment must have an owner
- Every comment must have a time and text
- Every comment must be associated with an existing task
- Every list must have a title and must be associated with an existing board
- Every task must be associated with an existing list
- Every entity in every table has a unique id

1.4 Assumptions About the Domain

• Users should only have access to the boards they are members of

1.5 Database Design Process

1.6 Ollert's tables

1.6.1 Functional Dependencies

1.6.2 Primary Keys

- ApplicationUser
 - ApplicationUser.Id
- Board
 - Board.Id
- BoardMember
 - none
- List
 - List.Id
- Task
 - Task.Id
- TaskAssignee

- none
- \bullet Comment
 - Comment.Id

1.6.3 Foreign Keys

- Board
 - ApplicationUser.Id
- BoardMember
 - Board.Id
 - ApplicationUser.Id
- \bullet List
 - Board.Id
- Task
 - List.Id
- TaskAssignee
 - Task. Id
 - ApplicationUser.Id
- Comment
 - Task. Id
 - ApplicationUser.Id

2 Database Implementation

2.1 Create Table Statements

```
create table ApplicationUser(
   Id char(32),
   Username varchar(100) not null,
   Passwordhash varchar(100) not null,
   primary key ( Id )
);
```

Listing 1: ApplicationUser Table Creation Statement

```
create table Board(
    Id char(32),
    Title varchar(100) not null,
    OwnerId char(32),
    primary key ( id ),
    foreign key ( OwnerId ) references ApplicationUser( Id )
);
```

Listing 2: Board Table Creation Statement

```
create table BoardMember(
BoardId char(32),
MemberId char(32),
foreign key ( BoardId ) references Board( Id ),
foreign key ( MemberId ) references ApplicationUser( Id )
);
```

Listing 3: BoardMember Table Creation Statement

```
create table List(
   Id char(32),
   Title varchar(100) not null,
   BoardPosition int not null,
   BoardId char(32),
   primary key ( id ),
   foreign key ( BoardId ) references Board( Id )
  );
```

Listing 4: List Table Creation Statement

```
create table Task(
Id char(32),
Title varchar(100) not null,
Descriptor varchar(500) not null,
DueDate datetimeoffset,
ListId char(32),
primary key (id),
```

```
s foreign key ( ListId ) references List( Id )
9
10
```

Listing 5: Task Table Creation Statement

```
create table TaskAssignee(
TaskId char(32),
AssigneeId char(32),
foreign key ( TaskId ) references Task( Id ),
foreign key ( AssigneeId ) references ApplicationUser( Id )

AssigneeId )
```

Listing 6: TaskAssignee Table Creation Statement

```
create table Comment(
    Id char(32),
    TimeCreated datetimeoffset not null,
    MessageText varchar(100) not null,
    TaskId char(32),
    OwnerId char(32),
    primary key ( id ),
    foreign key ( TaskId ) references Task( Id ),
    foreign key ( OwnerId ) references ApplicationUser( Id )
    )
```

Listing 7: Comment Table Creation Statement

2.2 Insert Statements

```
insert into ApplicationUser values ("19843875-6077-49", "Walter
Rogers",
"168
E5F6A717237FB2232A8AFE2DAAE3F8D582C5D4CC0EAA268F05F420F1EC421");

insert into ApplicationUser values ("372a9ad5-4952-44", "Jean
Bryant",

DAB12D7BB613EAC0304D9917738729FB37B60EBB1FB59FC9493ED64733CCE3BA");
```

Listing 8: ApplicationUser Insert Statements

Listing 9: Board Insert Statements

Listing 10: BoardMember Insert Statements

```
insert into List values ("64251244-40f5-45","Admin Website", 2, "
bbdd7100-cd10-41");

insert into List values ("a583557a-3d83-4a","Art Design", 0, "
62376bd0-6ecc-4f");
```

Listing 11: List Insert Statements

```
insert into Task values ("e01479d6-6019-4a", "Database Design", "
    Design a robust database schema for storing all the data in our
    app.", "20180120 09:00:00 +10:00", "0e72d679-da23-41");

insert into Task values ("d46993c0-ce64-46", "Story Design", "
    Write a fun story for the game.", "20180620 09:00:00 +10:00", "
    a583557a-3d83-4a");
```

Listing 12: Task Insert Statements

Listing 13: TaskAssignee Insert Statements

Listing 14: Comment Insert Statements

2.3 Data manipulation statements

2.3.1 Select statements

SELECT TOP 1 Count(*) as NumComments, Username FROM ApplicationUser, Comment WHERE ApplicationUser.Id=Comment.OwnerId GROUP BY
Username ORDER BY NumComments desc;

Listing 15: Select Most Active Task by Number of Comments

1 SELECT TOP 1 Count(*) as NumComments, Title FROM Task, Comment WHERE Task.Id=Comment.TaskId GROUP BY Title ORDER BY NumComments desc;

Listing 16: Select Most Active User (Comments)

2.3.2 Other Statements

2.3.3 Update statements

3 Index

Listings

1	ApplicationUser Table Creation Statement
2	Board Table Creation Statement
3	BoardMember Table Creation Statement
4	List Table Creation Statement
5	Task Table Creation Statement
6	TaskAssignee Table Creation Statement
7	Comment Table Creation Statement
8	ApplicationUser Insert Statements
9	Board Insert Statements
10	BoardMember Insert Statements
11	List Insert Statements
12	Task Insert Statements
13	TaskAssignee Insert Statements
14	Comment Insert Statements
15	Select Most Active Task by Number of Comments
16	Select Most Active User (Comments)
